SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, Tailwind CSS, Redux

Backend & Data: Node.js, Express.js, REST APIs, SQL, PostgreSQL, MongoDB, Redis, Drizzle ORM

Cloud, Testing & Integrations: AWS (ECS/Fargate, Lambda, API Gateway, RDS, S3, CloudFront, CloudWatch), Azure, Terraform, Docker, GitHub Actions, Jest, Playwright, Stripe, Salesforce, OAuth, OpenAI

WORK EXPERIENCE

Full Stack Engineer II | KriTech Solutions, LLC

October 2024 - Present

- Architected multiple Node.js/Express.js REST APIs for a repair-quoting platform supporting a \$1M partner contract, separating client-owned code from proprietary PDF-parsing and vehicle-matching services.
- Deployed an automated quote platform to AWS ECS/Fargate with Terraform and GitHub Actions, load-tested 100 concurrent quote generations, configured autoscaling, and monitored a 20 auto body shop pilot before full rollout.
- Designed a React/TypeScript and Node.js audit system that parsed vendor invoice PDFs, matched line items against internal purchase records, and identified roughly \$200K+ in inventory quantity and pricing mismatches.
- Developed the comparable-vehicle engine behind our valuation report software, expanding searches when local inventory was limited and ranking vehicle listings by distance, similarity, and mileage; added a PostgreSQL/RDS cache that served 68% of lookups and saved \$299/month in API costs by keeping usage within a lower pricing tier.
- Launched 3 SaaS products generating \$4K+ MRR, building serverless APIs with AWS Lambda/API Gateway and deploying React apps through S3/CloudFront, infrastructure managed by Terraform and monitored in CloudWatch.
- Took over an Azure-hosted production app, diagnosing billing and account-access failures across Node.js services, MongoDB/Redis, Salesforce, and Stripe while expanding Jest integration and Playwright end-to-end tests.
- Developed an equipment-management React app where technicians scan QR codes to check tools in/out and record photos or repair needs, giving managers and auditors real-time equipment usage and condition logs.

Full Stack Engineer | Freelance

May 2023 - October 2024

- Built and maintained a Next.js/TypeScript platform for a college-counseling business, handling enrollment and PayPal payments while processing \$190K+ in customer purchases.
- Shipped a client lead-gen site in one month, generating 25+ qualified inquiries and supporting \$35K+ in sales.

Quality Assurance Engineer | SEGA of America

April 2023 - March 2024

- Tested 7 AAA titles across console and PC releases, reproducing and documenting 400+ defects and partnering with developers to isolate issues and verify fixes across gameplay, multiplayer, localization, DLC, and release builds.

Developer / Lead Developer | Connected Camps

March 2020 - April 2023

- Promoted from developer to lead developer, scripting Minecraft mods and building Roblox games in Lua while leading teams of 3–8 developers across 16 shipped educational STEM programs.

PROJECTS

UpdateTags | Next.js, TypeScript, Supabase/PostgreSQL, Stripe, OpenAI

[Live Site](#) | [GitHub](#)

- Developed and launched a Next.js/TypeScript SaaS using OpenAI to turn Etsy listing content into structured tag recommendations, with Google OAuth, Stripe payments, PostgreSQL usage tracking, and user generation limits.

On Track | TypeScript, Node.js, VS Code Extension API

[Marketplace](#) | [GitHub](#)

- Built, published, and open-sourced a VS Code extension that tracks multiple AI coding-agent sessions, surfaces status and elapsed time inside the editor, and links developers back to active conversations.

EDUCATION

University of California, Irvine | B.S. Computer Game Science | 3.8 GPA

2020
